

IPIR ENGINEERED VENEERS

Greenline Industries is the exclusive North American distributor of Ipir Engineered Wood Veneers in the United States. We are a member of the Architectural Woodwork Institute, and are FSC® certified by the Forest Stewardship Council. We are based in the United States.

ASSEMBLED IN USA

A BEAUTIFUL BLEND OF ART, SCIENCE, AND NATURE.

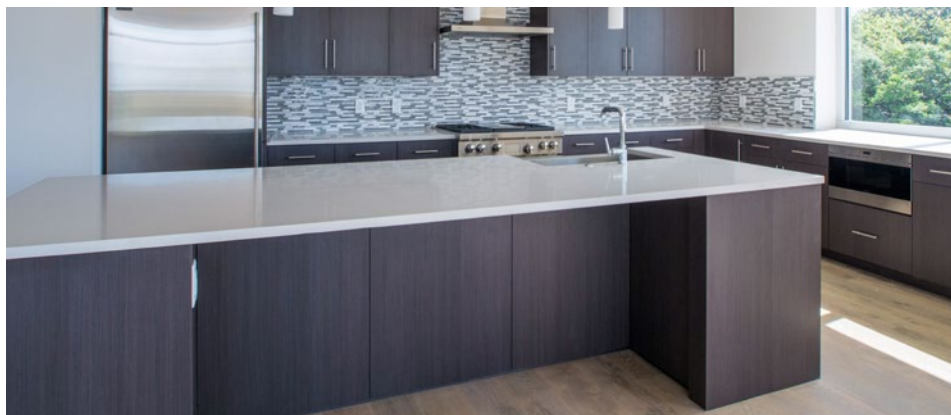

Our Ipir Line of Engineered Natural Wood Veneers brings together state-of-the-art manufacturing technology and the best of what nature has to offer. Utilizing environmentally friendly materials from managed forests throughout the world, our Ipir engineered veneers are available in a variety of species and cuts, offering our customers endless opportunities for design.

The Superior Choice

The unique manufacturing process used to create our engineered veneers enables consistency that is unattainable with natural veneers. This process ensures uniformity and repeatability of grain and color from sheet to sheet. Engineered Natural Wood Veneers are also an economic and responsible alternative to expensive natural veneers which are becoming difficult to source due to production and environmental concerns.

Renewable and Sustainable

The natural woods used to manufacture our engineered panels are harvested in partnership with government agencies to ensure sustainable use of forestry, wildlife, and fishery resources.

MARKETS SERVICED

Ipir Engineered Veneers are optimum for markets where consistency and customization are critical to success:

- Distribution
- Architectural Millwork
- Kitchen Manufacturers
- Laboratory Casework
- Store Fixture
- Marine and RV Panels
- Architectural Design & Specification

Quick Shipping and Custom Orders

Incorporating state of the art manufacturing techniques and equipment, and operated by a highly skilled production team, Greenline Industries is able to meet your quantity and time-line commitments. We specialize in large and small panel runs and offer substrates to meet today's industry and environmental specifications.

Wide Range of Stock Patterns

Our Engineered Wood Veneers are available in 33 stock patterns. Choices include teak, oak, zebrano, macassar ebony, cherry, maple, wenge, walnut, mahogany, fir and burl. Most species are available in both quarter cut and flat cut veneers. Several other limited availability patterns available in stock.

Wide variety of core options

We stock over 50 different core materials to meet your demanding project requirements.

Multiple edgebanding widths

Matching edgebanding is available for all stock patterns, with custom sizes available.

Blue Print & Cut to Size Panels

We can custom cut veneer panels to match your CAD drawings.

PRODUCT SPECIFICATIONS

Components by Weight:

Wood Fiber 90%, Glue 8%, Dyes 2%

Adhesive:

The adhesive used in Ipir composite veneers is made from a ureic resin that meets the allowable limits established by North American and International laws.

Dyes:

Water soluble aniline dyes are used to produce the various shades found in Ipir composite veneers.

Environmental Impact:

- Sustainability of our forest domestically and globally
- Yield of veneer from one log is approximately 40 times more surface area than from solid lumber
- Greenline Industries is FSC® certified by the Forest Stewardship Council
- Environmentally appropriate forest management ensures that the harvest of timber and non-timber products maintains the forests biodiversity, productivity and ecological processes
