

Elevations Custom Panels™

COLLECTION

About Us

Greenline Industries designs and manufactures premium wood veneer plywood & panels which are ideal for custom interiors, architectural millwork, casework, cabinetry, doors, elevators and furniture. We stock a wide selection of natural wood veneers and engineered veneers and customize and manufacture to your specifications and timelines.

We service a wide range of customers in:

- Architectural Millwork
- Commercial Store Fronts
- Healthcare/Laboratory
- Contract Furniture
- Kitchen and Bath
- Hospitality
- Elevators

Elevations Custom Panels™

Bold, Beautiful Art in Wood.

Elevate your space to the next level with Elevations Custom Panels™. Whether striking or subtle, patterns in real wood and engineered veneers provide you design flexibility to bring your vision to reality. Patterns are precision cut and scaled for your application - the creative possibilities are boundless!

A Personalized Process for One-of-a-Kind Designs

Each of our Elevations Custom Panels™ has a unique creation story from conception, to design, to fabrication.

Design

Choose an existing pattern from our gallery, work with our designers, or supply your own in any drawing or CAD software! Then make product selections so that our team can render the pattern with the desired veneer species, cut, and grain direction to achieve your desired effect. Our designers can even render the pattern in a space like yours.

Elevate your space to the next level with Elevations Custom Panels™
